

NEW KUZMA CAR CARTRIDGES 2017

CAR 60 is now our top model featuring diamond cantilever which is very stiff and most damped then any other material used for cantilevers thus bringing more music realism from your records.

CAR 20H (High output: 2mV) is bringing quality of musical reproduction reserved for MC cartridges to music lovers whose MM phono inputs do not have enough gain to use MC cartridges. CAR 20 H connects directly to MM input or MC inputs with insufficient gain.

| Model: | CAR 20H | CAR 60 | |
|-------------------------|----------------------|-----------------|----------------|
| Type: | High output MC | Low output MC | |
| Coil wire: | STD copper | 4N Silver wire | |
| Cantilever material: | Aluminium | Diamond | |
| Stylus: | Synthetic elliptical | Micro ridge | |
| Frequency response: | 10 Hz- 30 kHz | 10 Hz- 45 kHz | |
| Output voltage: | 2mV | 0,3 mV | 3,54 cm/ 1 kHz |
| Channel balance : | < 1,5 dB | < 1,0 dB | 1 kHz |
| Channel separation: | > 20 dB | > 30 dB | 1 kHz |
| Tracking force: | 2,0 g | 2,0 g | |
| Compliance: | 8x10-6 cm/dyne | 10x10-6 cm/dyne | |
| Trackability: | > 60 micron | > 70 micron | 2,0 g |
| Internal impedance: | 130 Ohm | 6 Ohm | |
| Load impedance: | 47 kOhm | > 100 Ohm | |
| Weight: | 17 g | 17 g | |
| Suggested retail price: | 1,600 EUR | 12,700 EUR | |
| Delivery time: | Jan/2017 | April/2017 | |
