

KUZMA STABI S PLATTER KIT

This kit consists from extra platter and a pair of spiked legs. Extra platter is positioned below the original platter, thus increasing height for 10mm. So the arm and lid must be raised for the same height. Tonearm is simply lifted with lifting brass insert which holds arm. On the right hand side add two spikes on the edge of the lid.

Stabi S platter kit : Technical data

Platter mass: 2.5 kg
Added two spikes for lid height increase
