

Kuzma Stogi S 12 Tonearm

The Stogi S 12 Tonearm

This is a 12 inch version of Stogi S unipivot tonearm.

The rigid headshell is made from a solid aluminium block and a base of solid brass, which control all vibration and facilitate stability of the tonearm as a whole. All parts of the arm are machined from blocks of solid metal, in order to provide damping and minimise resonance. The polished pivot point is sited in an oil well, which provides extremely low friction and bearing vibrations. The height is at record level for optimum tracking. The silicone damping, controls resonance of the cartridge and also gives stability in azimuth direction.

Three counterweights allow easy adjustments of tracking force and azimuth. Fine azimuth adjustment is achieved by rotation of a horizontal screw in the counterweight, which does not affect other tonearm parameters and which makes adjustment very simple.

Wires are in one uninterrupted piece from headshell to RCA or XLR connectors.

Technical data:

Effective length:	304.8 mm
Mounting distance:	291 mm
Offset angle:	17.8°
Effective mass:	13 g
Bearings:	unipivot
VTA adjustment:	yes
Bias adjustment:	yes
Azimuth adjustment:	yes
Arm mount:	Kuzma
Mass:	740 g (+ armbase 70 g)
